

The Population Association of Sri Lanka celebrated its Silver Jubilee: 1997 – 2022

The Inaugural Ceremony of the Silver Jubilee Celebrations, panel discussion on *Population Dynamics in the Context of Current Economic Crisis in Sri Lanka* and launching of the Sri Lanka Journal of Population Studies (SLJPS) Volume 22 Number 2 and Volume 23 Number 1, together with the AGM of the Association was held on 26 November 2022 at the Senate Hall, University of Colombo. The event was graced by the Chief Guest, Senior Professor H.D. Karunaratne – Vice Chancellor, University of Colombo, Guest of Honour, Mr. Kunle Adeniyi – Officer in Charge, UNFPA Country office, Sri Lanka, Dr. Indu R. Bandara, President/PASL and Ms. Samanthi Bandara, Secretary/PASL.

President's Message

It is a great pleasure to welcome you all to the first issue of the 2022-2023 PASL newsletter. The Population Association of Sri Lanka (PASL) was founded on 8th February 1997 and celebrated its Silver Jubilee in November 2022. Over the last twenty-five years PASL has been making a significant contribution in addressing population and development issues in the country as well as in the Asian region. We are thankful to the UNFPA, Sri Lanka that has generously supported the PASL activities from its inception. The 25th Council commenced its tenure on 27th November 2022, and we have been planning a series of activities in recent months such as guest lecture series, networking, community outreach activities, workshops, scientific communications, and policy discussions among our members and collaborating organizations. The PASL Life Membership currently stands at 324. I would like to thank all members who have contributed to the activities of the 25th council. I wish to thank the Editor of the newsletter, Dr. Kumudika Boyagoda for her active contribution for publishing this newsletter. Finally, I am looking forward to your continuous contribution and active involvement in PASL activities.

Population Dynamics in the Context of Current Economic Crisis in Sri Lanka

Chairperson: Emeritus Professor KAP Siddhisena, Department of Demography, University of Colombo

The inauguration of the Silver Jubilee Celebrations was followed by a panel discussion. Given the present situation in the country and to capture how it can impact the demographics of Sri Lanka, the panel discussion was titled Population Dynamics in the Context of Current Economic Crisis in Sri Lanka. The discussion was Chaired by Emeritus Professor K.A.P. Siddhisena, a nationally and internationally acclaimed demographer and the founder Secretary of the PASL.

Speakers and Synopses

Economic crisis and its impact on population dynamics (Population change, Politics & Policies)

The World's population is rapidly changing, so is Sri Lanka's situation. In an extremely volatile economic backdrop, demography cannot be studied or used in isolation, though it has its distinct qualities. Addressing challenges on Demographic dividend and demographic disparity needs to be discussed within the broader parameters of political demography and how unpacking of such phenomena would provide better opportunities to find solutions for public policy making processes while addressing emerging insecurities among different population groups to build sustainable communities that live in harmony with dignity & equality.

Ms Madusha Dissanayake
Regional Programme Specialist
Asia-Pacific Regional Office (APRO)
United Nations Population Fund (UNFPA)

Demographic change, Economic Crisis, and Health (Aspects of mortality, morbidity and nutrition)

Sri Lanka is in an economic crisis, worst since the independence. The current crisis is surfacing at a crucial time in the demographic transition, where the child dependency is changing to old age dependency. This time the country needs a major economic boost to mark a sustainable economic development to cater to the growing older population. Policy decisions that are short sighted, politically biased, based on personal interests and ulterior motives have detailed the aspirations of the country. High inflation, threat to food security, depleted foreign reserves, and austerity measures adapted as solutions has heavy impact on the day to day lives of the people, especially on health and nutrition. The emerging evidence reveal those basic nutritional indicators of most vulnerable segments in the population, is heading to alarming levels of malnutrition, which could lead to a vicious cycle for generations. Escalations of medicinal prices has serious consequences for the growing elderly population, who are on lifelong treatment for chronic non communicable diseases. Within this context several concerns can be raised on the possible directions: Is the IMF Loan a magic tool?, Can the Budget Proposals show us a way out?, How trustworthy the statistics presented by CBSL and DCS?, What is the role of professionals?

Professor Manuj C. Weerasinghe
Department of Community Medicine, University of Colombo

Economic crisis and its impact on vulnerable groups (Aspects of women and children)

Crisis can be defined as a time of intense difficulty or danger, and certainly the economic crisis affecting Sri Lanka in 2022, following the two years of hardship created by the global Covid-19 pandemic has created a time of intense difficulty for all, as the stagflation that characterizes the economy afflicts the population in two ways: low or negative growth creating stagnation, reduce (ng opportunities for employment and micro enterprise activities, and reducing incomes and earnings on the one hand and hyperinflation, fueled further by exchange rate depreciation, decreasing household welfare as food and medicine prices rise incessantly, on the other. Vulnerability is defined as the quality or state of being exposed to the possibility of being harmed, either physically or emotionally, and an economic crisis when it adversely affects affordability and household wellbeing threatens physically in terms of malnutrition and ill health, and emotionally with rising uncertainty and hardship generating greater stress and mental health issues. While everyone is affected by the economic crisis this presentation will focus on the impacts confronting the most vulnerable: women, children, workers in the informal sector and the poor, as these groups will face the most severe temporal and inter-generational impacts. With children afflicted, future human capital is challenged by this economic crisis, which in turn could result in low economic growth in the future undoing the gains in the past that have been built up on the solid foundation of growth in human capital. Much negative anecdotal evidence exists, though not much

Recipient of Gold Medal – Deshabandu Emeritus Professor Lakshman Dissanayake
BDevS(Honors)(Colombo); PG Diploma (Colombo); MA (Brussels); PhD (Adelaide); FRSA (United Kingdom)

The Population Association of Sri Lanka felicitated Emeritus Professor Lakshman Dissanayake in recognition of his contribution to the field of demography both locally and internationally.

Professor Lakshman Dissanayake was former Vice Chancellor, and former Chair Professor of Demography, University of Colombo where he served for more than 40 years. He has been honoured with esteemed positions and awards nationally and internationally for his contributions to the field of Demography. He was honoured by the UNFPA when Sri Lanka celebrated their 50th year by allocating a section on him as a leading personality in the field of population in their main publication, "Perspectives: reflecting on the five decades of sexual and reproductive health and rights in Sri Lanka". He is a Fellow of the Royal Society of Arts (FRSA), UK. In 2019, he received National Honours- Deshabandu for his meritorious service to the nation (lifetime title). He was an Independent Expert at the SAARC Secretariat and functioned as the Lead Consultant to the UNFPA and various international organizations. He served as a member of 'Irregular Migration Research International Reference Panel' and is a member of the Research Advisory Group of the Department of Immigration and Border Protection of the Australian Government. He is a Member of the Migration Research Leaders Syndicate of the International Organization of Migration, Geneva, Switzerland. Professor Dissanayake is an Honorary Professor of the Yunnan University of China, Visiting Professor of the Leeds Metropolitan University, United Kingdom and Adjunct Member of the Hugo Centre for Population and Migration Research. Professor Dissanayake's expertise includes international and internal migration, population ageing, regional demography, and health demography. He has published books, book chapters and numerous research articles in local and internationally reputed journals. His research as well as related community extension work has provided a significant benefit, especially to the vulnerable communities in Sri Lanka and abroad.

PASL Guest Lectures

Ms. D.D.G.A. Seneviratne, Additional Director General (Statistics) and Dr. W.A. Chandani Wijebandara, Director (Statistics) from the Department of Census and Statistics conducted a lecture on "Population Censuses of Sri Lanka" on 4 January 2023 at the Faculty of Arts, University of Colombo. The lecture targeted undergraduates, and more than 100 students participated.
